7.	<p>When a project proposal is related to the development of the Spatial plan of the municipality, it is unclear whether the Spatial plan development itself must be grounded in a Strategy of Sustainable Development, or whether it is sufficient to be recognized that the Spatial Plan supports the achievement of project activities defined by the Strategy, concerning the use of natural and created resources, which, as such, must be included in the Spatial Plan, to allow their rational use.</p> <p>Specifically, the Strategy of sustainable development does not foresee development of the Spatial Plan, but does foresee project activities that must be supported by the Spatial Plan, such as. construction and improvement of infrastructure, creation of energy efficiency, improving water supply</p>	<p>If a Spatial Plan is necessary to support the implementation of goals/results/activities as identified in a municipal Strategy for Sustainable Development, in principle development of such a Spatial Plan is eligible. However, in the Application Form you should concretely and clearly describe link between the strategic document and proposed Action, i.e. which goals/results/activities in the municipal Strategy for Sustainable Development are supported by development of the Spatial Plan.</p>

		Therefore, your municipality is indeed allowed to take part in 3 projects at the same time (one time as Applicant and two times as partner).
12.	<p>When entering data in PADOR we ran into the following situation: All Serbian municipalities are obliged to complete the Final Financial Report for the year 2009 only by May 2010, so at the moment we do not have yet the Final Financial Report for 2010.</p> <p>When we opened the section in PADOR where we have to enter financial information about our municipality, we only found a row for 2009 and we filled it all with zeros (0) (Is it correct?).</p> <p>After I saved 2009, the next row (2008) was shown and we filled it with relevant data and saved it.</p> <p>After we saved the data for 2008, no new row was shown(!?) but we know that we need to fill this section for at least the last 3 years.</p> <p>We logged out and logged in a few times, but the problem occurred again and could not be solved.</p>	<p>Official information from PADOR help-desk:</p> <p>1. If you do not have yet the Final Financial Report for 2009, then indeed you can not fill in amounts for 2009. You have correctly entered zero's. You are advised to add however the financial data for 2009 in PADOR as soon they become available.</p> <p>2. Regarding number of available rows for financial data on previous years, please be informed that it depends on year of registration. As you have included 2007 as the date of registration, official response from PADOR help desk that it is not possible for you to get data for 2006. 3 years are requested maximum for old organisations (more than 3 years: they do not have to fill in everything)</p> <p>Possible solution would be to enter date of previous (first) registration.</p>
13.	<p>In the quick guide for local authorities (http://ec.europa.eu/europeaid/work/onlineservices/pador/documents/doc4_public_admin_en.pfd) we have found</p> <p>Financing sources <i>An option has been added in order to better cater for local authorities' needs:</i> <i>- "Taxes/Local taxes/Government donations", for which you should indicate 100% (fourth column)</i></p> <p>But, we cannot find that option in the dropdown menu of PADOR.</p> <p>However, in the hardcopy of the EC Application Form in the section Financial sources there is an option other(s) and it has an opportunity to be completed (please specify): which is an appropriate option for the Municipality to fill it with sentence: <i>"Taxes/Local</i></p>	<p>Information from PADOR help-desk:</p> <p>1. Currently this option is not permitted in the PADOR data base.</p> <p>However, please fill in information in the Application form (hard-copy).</p>
